ARUL MURUGAN J

Full Stack Developer | Chennai, Tamil Nadu (Open to Relocation)
+91-7539904141 | arulmurugan.code@gmail.com | linkedin.com/in/arul-murugan-j

PROFESSIONAL SUMMARY

Full Stack Developer with 2 years of experience building and deploying scalable web applications using React.js, Node.js, and TypeScript. Proficient in RESTful API development, JWT/OAuth 2.0, RBAC, and MySQL optimization. Experienced in microservices architecture, event-driven systems (RabbitMQ, Redis), Docker containerization, and AWS (EC2, S3) deployments. Hands-on with AI integration via OpenAI APIs and Retrieval-Augmented Generation (RAG) pipelines.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript
Frontend: React.js, HTML5, CSS3
Backend: Node.js, Express.js, RESTful APIs, TypeORM, Socket.IO, WebSocket
AI / Automation : RAG-Based AI Integration, MCP Server
Databases: MySQL, Database Design, Query Optimization
Caching and Messaging: Redis, RabbitMQ
Cloud and DevOps: AWS (EC2, S3), Docker, Linux, Nginx,
Auth and Security: JWT, OAuth 2.0, RBAC
Architecture: Microservices, Event-Driven Systems
Tools: Git, GitHub, Postman, VS Code, Coding Agents

PROFESSIONAL EXPERIENCE

Full Stack Developer | *Piccosoft Software Labs Pvt Ltd* | *March 2024 - Present* | *Chennai, Tamil Nadu*

- Built full-stack applications using React.js, Node.js, Express.js, and TypeScript across multiple production environments.
- Designed secure RESTful APIs with JWT authentication and RBAC authorization for role-based access control.
- Improved API performance via Redis caching and MySQL query optimization, reducing execution time significantly.
- Containerized and deployed applications with Docker on AWS EC2; managed static assets via S3.
- Delivered features end-to-end in Agile sprints, including code reviews and production releases.

System Administrator | *Struzon Technologies* | Oct *2022 – Dec 2023* | *Tamil Nadu*

- Managed Linux servers, configurations, and network infrastructure to ensure high uptime and reliability.
- Monitored system performance, resolved production incidents, and implemented security hardening and backup solutions.

KEY PROJECTS

AI-Powered Job Intelligence Platform | *Node.js, React.js, MySQL, Redis, RabbitMQ, Docker, Nginx, OpenAI*

- Architected a microservices-based platform for scraping and processing job and company data at scale.
- Built real-time log streaming via WebSockets and event-driven async pipelines using RabbitMQ.
- Integrated RAG-based AI querying with OpenAI APIs for contextual job insights and automated resume generation.
- Configured Nginx as an API gateway for multi-service routing and deployed all services with Docker.

E-Commerce Platform | *React.js, Node.js, TypeScript, MySQL, Redis, AWS*

- Developed a full-stack e-commerce platform with product catalog, cart, and order management workflows.
- Implemented JWT/RBAC authentication and payment gateway integration.
- Reduced API latency by approximately 35% through Redis caching and optimized MySQL query execution.

Blogging and CMS Platform | *Node.js, Express.js, MySQL*

- Built an SEO-optimized CMS with RESTful APIs and normalized database schemas for efficient content retrieval.

EDUCATION

Bachelor of Science - Visual Communication | Sree Amman Arts and Science College | 2018 - 2021 | Erode, Tamil Nadu
